Copyright
Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities all the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.
Manuscripts must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.
Reports of animal experiments must state that the "Principles of laboratory animal care" (NIH publication No. 85-23, revised 1985) were followed, as well as specific national laws (e.g. the current version of the German Law on the Protection of Animals) where applicable.
The managing editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or for failure to fulfil the above-mentioned requirements.
All articles published in this journal are protected by copyright, which covers the exclusive right to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.
The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept anyl legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA
Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-1200, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.
The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for an copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A OS2, Canada (Tel: 613-993-9251; Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 77

Accardo A, Affinito M, Carrozzi M, Bouquet F: Use of the fractal dimension for the analysis of electroencephalographic time series 339
Affinito M → Accardo A
Akay M → Redling JD
Aloimonos Y → Fermüller C
Andrushchenko AP, Samoilenko YuI, Yatsenko VA: The presence of both stochastic and deterministic dynamics in electroretinograms measured under identical experimental conditions 429

Baan GC → Zandwijk JP van
Baddeley R → Fotheringhame D
Bauer R, Dicke P: Fast cortical selection: a principle of neuronal self-organization for perception? 207
Baxter DA → Canavier CC
Bergey GK → Kudela P
Berthoz A → Hanneton S
Bertulis A → Bulatov A
Bobbert MF → Zandwijk JP van
Bouquet F → Accardo A
Bove M → Canepari M
Bruske J, Hansen M, Riehn L, Sommer G: Biologically inspired calibration-free adaptive saccade control of a binocular camera-head 433
Buizza A → Lazzari S
Bulatov A, Bertulis A, Mickienė L: Geometrical illusions: study and modelling 395
Butera RJ → Canavier CC
Butera RJ Jr., Clark JW Jr., Byrne JH: Transient responses of a modeled bursting neuron: analysis with equilibrium and averaged nullclines 307
Byrne JH → Butera RJ Jr.
Byrne JH → Canavier CC

Canavier CC, Butera RJ, Dror RO, Baxter DA, Clark JW, Byrne JH: Phase response characteristics of model neurons determine which patterns are expressed in a ring circuit model of gait generation 367
Canepari M, Bove M, Maeda E, Cappello M, Kawana A: Experimental analysis of neuronal dynamics in cultured cortical networks and transitions between different patterns of activity 153
Cappello M → Canepari M
Carrozzi M → Accardo A
Cerf R, Daoudi A, Ould Hénoune M, El Ouasdad EH: Episodes of low-dimensional self-organized dynamics from electroencephalographic α-signals 235
Chantelau K: Segmentation of moving images by the human visual system 89
Cheong LF → Fermüller C
Clark JW → Canavier CC
Clark JW Jr. → Butera RJ Jr.
Cohen MA → Grossberg S
Cohen MA → Pribe C
Craelius W → Curcie DJ
Curcie DJ, Craelius W: Recognition of individual heart rate patterns with cepstral vectors 103

Daoudi A → Cerf R
Der R, Herrmann M, Villmann T: Time behavior of topological ordering in self-organizing feature mapping 419
Dicke P → Bauer R
Ditzinger T, Tuller B, Haken H, Kelso JAS: A synergetic model for the verbal transformation effect 31
Ditzinger T, Tuller B, Kelso JAS: Temporal patterning in an auditory illusion: the verbal transformation effect 23
Dror RO → Canavier CC
Droulez J → Hanneton S

El Ouasdad EH → Cerf R
Eurich CW, Schwegler H, Woesler R: Coarse coding: applications to the visual system of salamanders 41
Everson R, Knight BW, Sirovich L: Separating spatially distributed response to stimulation from background. I. Optical imaging 407

Fermüller C, Cheong LF, Aloimonos Y: Visual space distortion 323
Fortrat J-O, Yamamoto Y, Hughson RL: Respiratory influences on non-linear dynamics of heart rate variability in humans 1
Fotheringhame D, Baddeley R: Nonlinear principal components analysis of neuronal spike train data 283
Franaszczuk PJ → Kudela P
Funahashi Y → Yagi T

Gauthier G → Vercher J-L
Grossberg S, Pribe C, Cohen MA: Neural control of interlimb oscillations. I. Human bimanual coordination 131
Grossberg S → Pribe C

Haken H → Ditzinger T
Hamada T, Yamashima M, Kato K: A ring model for spatiotemporal properties of simple cells in the visual cortex 225
Hanneton S, Berthoz A, Droulez J, Slotine JJE: Does the brain use sliding variables for the control of movements? 381
Hansen M → Bruske J
Heijst JJ van, Vos JE: Self-organizing effects of spontaneous neural activity on the development of spinal locomotor circuits in vertebrates 185
Hemmen JL van → Wimbauer S
Herrmann M → Der R
Hughson RL → Fortrat J-O
Huijing PA → Zandwijk JP van

Inbar GF → Karniel A
Iyengar S, Liao Q: Modeling neural activity using the generalized inverse Gaussian distribution 289

Jacobs R: Control model of human stance using fuzzy logic 63

Kamp Y: Social insects with memory 447
Karniel A, Inbar GF: A model for learning human reaching movements 173
Kato K → Hamada T
Kawana A → Canepari M
Kehrer L: The central performance drop in texture segmentation: a simulation based on a spatial filter model 297
Kelso JAS → Ditzinger T
Keunen RWM → Stam CJ
Knight BW → Everson R
Kudela P, Franaszczuk PJ, Bergey GK: A simple computer model of excitable synaptically connected neurons 71

Laboissière R → Sanguineti V
Lazzari S, Vercher J-L, Buizza A: Manuo-ocular coordination in target tracking. I. A model simulating human performance 257
Lazzari S → Vercher J-L
Lee WA, Patton JL: Learned changes in the complexity of movement organization during multijoint, standing pulls 197
Liao Q → Iyengar S
Liu F, Wang W, Yao X: Dynamics of the noisy neural network 217

Maeda E → Canepari M
Meyer-Bäse U, Scheich H: Artificial implementation of auditory neurons: A comparison of biologically motivated models and a new transfer function oriented model 123
Mickienė L → Bulatov A
Miller KD → Wimbauer S
Miller R → Wickens JR

Ohshima S → Yagi T
Ould Hénoune M → Cerf R

Parkins EJ: Cerebellum and cerebrum in adaptive control and cognition: a review 79
Patton JL → Lee WA
Pavlásek J: Timing of neural commands: a model study with neuronal networks 359
Payan Y → Sanguineti V
Pribe C, Grossberg S, Cohen MA: Neural control of interlimb oscillations. II. Biped and quadruped gaits and bifurcations 141
Pribe C → Grossberg S

Redling JD, Akay M: Noninvasive cardiac output estimation: a preliminary study 111
Riehn L → Bruske J

Samoilenko YuI → Andrushchenko AP
Sanguineti V, Laboissière R, Payan Y: A control model of human tongue movements in speech 11
Scheich H → Meyer-Bäse U
Schwegler H → Eurich CW
Sirovich L → Everson R
Slotine JJE → Hanneton S
Sommer G → Bruske J
Stam CJ, Woerkom TCAM van, Keunen RWM: Non-linear analysis of the electroencephalogram in Creutzfeldt-Jakob disease 247

Tuller B → Ditzinger T

Van Hulle MM: Nonparametric density estimation and regression achieved with topographic maps maximizing the information-theoretic entropy of their outputs 49
Vercher J-L, Lazzari S, Gauthier G: Manuo-ocular coordination in target tracking. II. Comparing the model with human behavior 267
Vercher J-L → Lazzari S
Villmann T → Der R
Vos JE → Heijst JJ van

Wang W → Liu F
Wenisch OG → Wimbauer S
Wickens JR, Miller R: A formalisation of the neural assembly concept. 1. Constraints on neural assembly size 351
Wimbauer S, Wenisch OG, Hemmen JL van, Miller KD: Development of spatio-temporal receptive fields of simple cells: II. Simulation and analysis 463
Wimbauer S, Wenisch OG, Miller KD, Hemmen JL van: Development of spatio-temporal receptive fields fo simple cells: I. Model formulation 453
Woerkom TCAM van → Stam CJ
Woesler R → Eurich CW

Yagi T, Ohshima S, Funahashi Y: The role of retinal bipolar cell in early vision: an implication with analogue networks and regularization theory 163
Yamamoto Y → Fortrat J-O
Yamashima M → Hamada T
Yao X → Liu F
Yatsenko VA → Andrushchenko AP

Zandwijk JP van, Baan GC, Bobbert MF, Huijing PA: Evaluation of a self-consistent method for calculating muscle parameters from a set of isokinetic releases 277
